

Defense Maintenance

Stock #1654-5 (120 capsules)

Defense Maintenance is designed to provide the nutritional support essential for healthy immune system function. Defense Maintenance combines vitamins, minerals, herbs and cruciferous vegetables, all beneficial for increasing immunity and protecting the body against free radical damage. Many of these nutrients are known, not only for stimulating the immune system, but also for inhibiting cancer. Defense Maintenance also contains nutrients required by the body to make a powerful antioxidant known as Super-Oxide Dismutase (SOD).

SOD is a powerful antioxidant which helps to slow cellular degeneration and mutation, making it highly beneficial for treating degenerative diseases, as well as aging in general. SOD naturally occurs in healthy cells, protecting them from the damage caused by free radicals.

Each capsule of Defense Maintenance provides:

- Vitamin A (from beta-carotene and fish oils) - 5,000 IU
- Vitamin C - 120mg
- Vitamin E - 60 IU
