

## Jojoba Oil

Stock #1695-1 (0.5 fl. oz.)

Obtained from the seeds of the jojoba plant, this rich oil has been used for centuries for its moisturizing benefits for dry hair and skin. Jojoba oil nourishes the scalp, giving hair added body, shine and protection. Jojoba oil can be used on both dry and oily hair, and is the perfect complement to Herbal Shampoo. Some people prefer to add jojoba oil to their shampoo, while others prefer to use the oil directly on their hair after shampooing and rinsing.

Jojoba oil is an excellent external moisturizer for dry hair and skin. Jojoba oil contains proteins, minerals, and a wax-like substance which mimics collagen and promotes healthy skin by improving acne, psoriasis, and sunburn.
